Ekansh Sharma

Contact Information	Email: ekansh@cs.toronto.edu Website: https://ekanshs.github.io/ GitHub: https://github.com/ekanshs
Education	 University of Toronto, Toronto, ON, Canada Doctor of Philosophy, Computer Science, expected 2025 Thesis: Exploiting linear connectivity modulo permutations in neural networks for parsimonious machine learning Adviser: Prof. Daniel M. Roy
	University of Toronto , Toronto, ON, Canada Master of Science, Computer Science, conferred 2018 Thesis: Sparse exchangeable bi-partite graphs Adviser: Prof. Daniel M. Roy
	University of Toronto , Toronto, ON, Canada Bachelor of Applied Science with Honors, Electrical Engineering, conferred 2016 Minor in Robotics and Mechatronics
Professional Experience	Vector Institute, Toronto, ON, CanadaGraduate Research StudentWinter 2018 - PresentAdviser: Prof. Daniel M. RoyResearch Topic: Deep learning; Transfer learning; Model compression.Interests: My research exploits the geometric properties of deep neural network losslandscapes to design algorithms for model compression and model merging.
	 Amazon.com, Edinburgh, UK Applied Scientist Intern Winter 2021 Sponsored Display (Ads team) Developed counterfactual analysis tools to assess the impact of different ad selection policies aimed at reducing costs for running explicit A/B tests. Conducted A/B tests to compare the performance of Upper Confidence Bound (UCB) algorithms against existing baseline ad selection methods at Amazon, measuring click-conversion rate.
	 Altera Corp., Toronto, ON, Canada Software Engineering Intern Detailed Placement Team Modeled bidirectional long wire congestion on the chip to get better wire use estimate during placement.
	Microsoft Corp., Redmond, WA, USA Software Development Engineering Intern Summer 2014 Azure Redis Cache Team • Developed Redis output-cache provider feature for ASP.NET developers.
Preprints	Sharma E. , Roy D.M., Dziugaite G. K "The non-local merging problem: Permutation symmetries and variance collapse." <i>arXiv preprint arXiv:2410.12766</i> .

Refereed Publications	Mohammed A., Jain R., Sharma E. , Krishnan, R, Ioannou, Y. "Sparse Training from Random Initialization: Aligning Lottery Ticket Masks using Weight Symmetry." (to appear) International Conference on Machine Learning (ICML) 2025, Vancouver, Canada
	Sharma E., Kwok D., Denton T., Roy D.M., Rolnick D., Dziugaite G. K "Si- multaneous linear connectivity of neural networks modulo permutation." <i>Joint Euro-</i> <i>pean Conference on Machine Learning and Knowledge Discovery in Databases. Cham:</i> <i>Springer Nature Switzerland, 2024 (link).</i>

Presented at the <i>In NeurIPS Workshop Machine Learning for Health 2016</i> , Barcelona, Spain (link).
Technical Reports	Sharma E. , Roy D. M "Approximations in Probabilistic Programs." <i>arXiv preprint arXiv:1912.06791.</i> (poster)
	Veitch, V., Sharma, E. , Naulet, Z., Roy, D. M. (2017). "Exchangeable modelling of relational data: checking sparsity, train-test splitting, and sparse exchangeable Poisson matrix factorization." <i>arXiv preprint arXiv:1712.02311.</i> (slides)
Undergraduate Research Projects	 Autonomous Wing Assembly Process Multidisciplinary Capstone Project Client: Bombardier Aerospace, North York, ON Adviser: Prof. Jonathan Kelly

	- Designed and built a functioning prototype of an autonomous robot to join two wing halves for Global Express $7000/8000$ series of business jets.
	 Efficient implementation of a graphical model for identifying disease mechanisms in complex human diseases Adviser: Prof. Anna Goldenberg Implemented a graphical model that combines multiple sources of genetic and genomic data to identify sets of genes that could explain the presence of a disease in a larger number of patients. Changed the structure of graphical model that resulted in 40% run-time savings.
	 Extending the user-space implementation of online filesystem consistency checker using Linux KVM Adviser: Prof. Ashvin Goel Worked on RECON, an online filesystem consistency checker. Extended the user-space implementation of RECON to use Linux KVM.
Awards and Honors	Vector Research Grant2018-2024Department of Computer Science 50th Anniversary Graduate Scholarship2017University of Toronto Excellence Award2013, 2015Dean's Honors List2011-2016
Skills	Programming Languages: Python, C,C++,C#, Java Deep-learning frameworks: JAX, PyTorch, Tensorflow
Teaching Assistantship	Machine Learning (CSC2515)Fall 2019, Fall 2021, Fall 2022Data Structures and Analysis (CSC263)Fall 2018Enriched Theory of Computation (CSC240)Winter 2018Theory of Computation (CSC236)Winter 2019, Winter 2017, Fall 2016
Relevant Coursework	Statistical Learning Theory; Graphs, Matrices, and Optimization; Algorithms for Private Data Analysis; Monte Carlo Methods; Computability and Logic; Compilers and Interpreters; Computational Neuroscience; Machine Learning; Inference Algorithms; Random Processes; Neural Networks; Robot Modeling and Control.
Academic Services	Served as a reviewer for ICLR 2020, ICLR 2021, NeurIPS2021, ICLR 2022 NeurIPS 2022, ICLR 2023, ICML 2023, NeurIPS 2023, ICML2024, ICML 2025.
